VATICAN OFFICIAL TIED TO BP, GOLDMAN-SACHS, AND MEDIA CENSORSHIP IN THE OIL FIASCO INCREASING EVIDENCE OF FOUL PLAY

by

Sherri Kane and Leonard G. Horowitz

News unfolding from the oil crisis in the Gulf of Mexico has linked media censorship to investment bankers at Goldman Sachs (GS) stewarding the Vatican's wealth, and increasing evidence that the explosion was intended.

A near total news blackout from independent sources, and arrests of anyone caught photographing and filming the devastation, show the Halliburton-British Petroleum (BP) oil crisis is being criminally controlled, implicating some of Wall Street's heaviest hitters.

According to a report issued by frightened, yet faithful, documentary filmmaker, James Fox, interviewed from the Gulf's Grand Isles by Mel Fabregas on the [Internet's Veritas Radio Show](#), "There is a complete media blackout" on news coverage broadcast from the region.

"They are arresting people with cameras and anyone off camera that is caught talking to a reporter," Fox testified.

Another reporter told Fox, "You call this a free country? Right here, in the United States of America, there's no freedom of press. There's no freedom of speech. They're closing down the airspace above the oil spill, so reporter's can't fly over to determine how bad these oil plumes really are."

Suspicious pieces of this deadly puzzle feature Halliburton, the world's second largest oil field services company, headquartered in Houston and Dubai, whose negligence is blamed for the timely and profitable explosion.

Three weeks before the "natural gas leak," the George Bush/Dick Cheney 9-11-linked Halliburton company negotiated the purchase of the world's largest oil-spill cleanup firm ([Boots & Coats](#)) at the exact time keen observers on Wall Street--financial intelligence agents at Goldman Sachs (GS; often called "Government Sachs")--unloaded [44% of their stock in BP](#).

These facts parallel the shorting of airline stocks by those in the know prior to the World Trade Center (WTC) 9-11 attacks that [new scientific evidence](#) proves were followed by building demolitions, given the red thermite incendiary powder found everywhere around ground zero.

The WTC lessor, Larry Silverstein, partnered with Lloyd Blankfein of GS in the little known [Partnership for New York City \(PFNYC\)](#), took out a General Electric insurance policy just six weeks before the attacks. PFNYC "partners," in charge of assessing financial damages to NYC, and reconstruction plans for the WTC, obviously "veered" insurance payoffs and additional private equity investments to Las Vegas for the construction of the 9-11 memorial--speciously called the "Veer Towers" in the "New World Center." (Watch [PHARMAWHORES](#), the movie; 1-888-508-4787.)

Blankfein, the PFNYC Co-Chairman and GS CEO, was barraged with indictments and rising media infamy regarding Government Sachs's conflicting interests effectively demolishing the US economy through the "shorting" of the housing industry--scrutiny suspended by Halliburton's oil rig synchronously exploding most profitably for GS and its CEO.

GS is covertly invested in the Bush-Cheney-linked Halliburton Company [according to veteran observers](#). GS and Halliburton both had massive financial incentives to cause the profitable explosions--the three 9-11 WTC building demolitions, and the most recent "accident" in the Gulf.

The media's gross neglect of the full extent of the crisis obviously supports GS's damage control and incriminating connections. These include Blankfein's PFNYC Co-Chairman, Rupert Murdoch, and their pernicious influence over the major networks and the PFNYC--the world's leading petrochemical-pharmaceutical-biotechnology consortium profiting from death, disease, and environmental destruction. This unholy alliance best explains the media's aversion to responsible reporting in the Gulf and elsewhere.

Besides Blankfein and Government Sachs backing stock in both BP and Halliburton, another red oil-drenched herring is [Peter D. Sutherland](#)--the outgoing Chairman of BP is also the current Non-Executive Chairman of Goldman Sachs International.

The scariest part of this whole story is that Mr. Sutherland, the man standing with one foot in GS, and the other on the burning Halliburton-BP oil rig, is the Consultor of the Extraordinary Section of the Administration of the Patrimony of the Apostolic See. In other words, Sutherland is the chief financial adviser to the Pope.

In 2010, Mr. Sutherland finished a 13-year stint as Chairman of BP, Europe's largest oil company. A former Attorney General of Ireland, he is President of the Federal Trust for Education and Research, a British think tank whose efforts might better be called corporatist indoctrination than trustworthy "education." He is Chairman of The Ireland Fund of Great Britain, and a member of the advisory council of Business for New Europe--a pro-New-World-

Order European think-tank based in Britain.

From 1993-95, Sutherland was the Director-General of the World Trade Organization.

In January 2006, the current Non-executive Chairman of Goldman Sachs International, was appointed by United Nations Secretary General, Kofi Annan, as his *Special Representative for Migration*.

Now, ironically, Sutherland's mission impossible is to migrate marine flora and fauna, fisherman, and coastal residents out of harms way in this spreading international emergency.
